

WOMEN IN ENGINEERING

WILTSHIRE COLLEGE (CHIPPENHAM)

6 MARCH 2020

On Friday 6 March, as part of National Careers Week, we took a minibus of girls to Wiltshire College (Chippenham) to take part in a Women in Engineering Day. The event was targeted at Year 10 girls and was aimed to inspire them to consider a career in engineering, science, technology and maths.

The day was jammed packed full of amazing hands on activities for the girls to take part in. They learnt about the different variety of engineering careers that were out there and how women can be involved – it's not just about cars and engines!

Some of the activities they took part in were: Chemical engineering, Cosmetic engineering, Robotics and Digital Technology, Civil engineering, Motorsport to name but a few! The girls had a fantastic time and learnt about careers they never knew existed in the world of engineering.

The day was enjoyable and it helped me realise that some careers you didn't think needed a certain qualification, actually need it. An eye-opening experience.

I found the day at the college very interesting and inspiring. It has opened my eyes to the engineering "pathway".

The day was really fun and informative. It helped me learn more about future options.
