*Homework is expected to take at least 15 minutes per subject as a general guide.\*  
Project work may take longer, and longer deadlines will be given for these types of homework.*

*Should the HW not take the amount specified above, then pupils should use the remaining time to develop as independent learners by reviewing their notes, consolidating their learning and/or creating revision resources. The more pupils revisit work they have done, the more it will stick in their long-term memory.*

*\* Maths will be set once a week, but we recommend spreading this out so that Maths is practiced each evening.*
