*Homework is expected to take **15 minutes** per subject as a general guide.* Project work may take longer, and longer deadlines will be given for these types of homework.*

Should the HW not take the amount specified above, then pupils should use the remaining time to develop as independent learners by reviewing their notes, consolidating their learning and/or creating revision resources. The more pupils revisit work they have done, the more it will stick in their long-term memory.

** Creative Arts, Technology and Drama will set up to 1 hour of homework per week.*

** MFL will be set at the beginning of the week and pupils can select which day is best to complete it, relative to their workload.*
