Homework is expected to take **20 minutes** per subject as a general guide.* Project work may take longer, and longer deadlines will be given for these types of homework.

Should the HW not take the amount specified above, then pupils should use the remaining time to develop as independent learners by reviewing their notes, consolidating their learning and/or creating revision resources. The more pupils revisit work they have done, the more it will stick in their long-term memory.

* Creative Arts, Technology and Drama will set up to 1 hour of homework per week.
